Assignment2 Guideline

2018079116

정진성

- Instruction

You do not need to compile this file because it was written in Python code.

But since I imported pandas, You have to do "pip install pandas" If the pandas is not installed.

To execute this file, first enter the path where the file "dt.py" is located.

Type "python dt.py dt_train.txt dt_test.txt dt_result.txt" in the path.

```

```

<command example>

This produces A, which stores the predicted value of label in the test set.

You can check the execution results.

<dt_result.txt content>

- python version

The environment is python 3.8.6 version.
